

**Our other
PREMIUM – PRODUCTS are:**

AQUA Foam [foam material]

This newly developed foam material removes dirt so gently that every car is “tickled” and guarantees no scratches or holograms are left on the vehicle’s paintwork.

AQUA Felt [washing felt]

AQUA Felt is a textile washing material providing high cleaning performance and extreme durability.

AQUA Felt distinguishes itself from other washing materials with its longevity and the low level of care needed.

AQUA Dry [synthetic drying material]

AQUA Dry is a drying material developed by **AQUA BRUSH** with a special composition of materials which, in turn, ensures efficient final drying and polishes paintwork to a mirror finish.

AQUA Pe [monofilament polythene brushes]

This excellent cleaning performance provided by the spliced ends of the material has proven its worth especially for service in commercial vehicle washes.

**Provider of washing brushes
for car washes**

For more than 20 years, **AQUA BRUSH** has been one of the specialist manufacturers of washing brushes for tunnel car washes, gantry car washes, commercial vehicle washes and special machines.

As such, we work on refining the widest range of washing and drying materials for mechanical vehicle washing.

AQUA Wool
[synthetic lambskin]

TUNNEL CAR WASHES

AQUA Wool

[synthetic lambskin]

AQUA Wool on the patented *multi-function fastener* is a washing material available exclusively from **AQUA BRUSH** for top-notch car wash designs. This synthetic wool-like textile guarantees gentle and quiet car washing.

AQUA Wool leaves virtually no deposits and gives the car paintwork a matchless shine.

AQUA Wool promises you:

- a low-noise washing process
- mildest cleaning
- high cleaning performance
- extremely gentle on the paintwork
- long service life
- easy to install
- patented mounting system
- available in various colours

Multi-function system

- special interchange system for **AQUA Wool** and **AQUA Dry**

With its variable fastening, **AQUA BRUSH's** patented multi-function system permits even use and wear of the washing material along the entire length of all four sides of the 'wash mitt' ('drying mitt').

How it works:
